

## HOTAIRSTATION 313

The **Hotairstation** can be used for different application and should be available in every catheter production.

It is helpful for heat shrink fixation, luer bend protection and welding of simple connections in different applications.

Possible process parameters are temperature, flow, time and nozzle shape.

Temperature Controller

Flow Controller

Nozzles

### Technical Specifications

- Heater 110/230V 50Hz
- 300 Watt heating element
- PID-Temperature controller
- Starter-kit with 3 different nozzles
- Digital Flow Controller 0-50.0nl/min
- Dimensions LxWxH 250 x 160 x 160 mm
- Weight 7 kg
- Power 115/230 VAC, 300Watt
- Air Pressure 6-10 bar (87-145 psi)
